SMART PLUG
QUICK START GUIDE

QUICK START GUIDE

1. Plug the Smart Plug into a desired outlet. The LED will start blinking green to indicate it is ready for network setup.

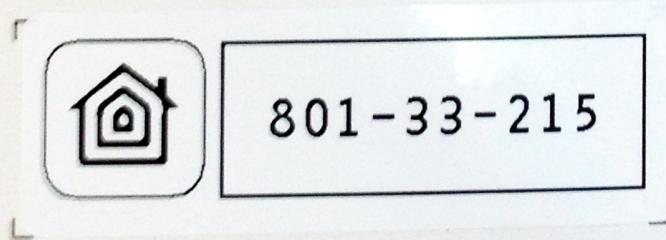

2. Make sure your iPhone or iPad (iOS 8.1 or later) is connected to a 2.4GHz Wi-Fi network. Using the router utility software, shutdown 5GHz Wi-Fi networks.

3. Download and open the free Koogeek Home app from the App Store.

4. Log in or sign up for a Koogeek account or simply tap Skip.

5. Tap "+" on the top right corner and follow the on-screen directions to complete network setup.

Note: To add more plugs (or repeat the plug setup process), tap "+" and you will see the accessory list. Each accessory has an identification code, e.g., Koogeek-XX-XXXXXX. Make sure the last 6 characters of the identification code is consistent with the last 6 characters of MAC on the back of your Smart Plug.

6. When prompted, scan the setup code or manually enter the setup code, and then follow the step to add the device to the Home and Room.

After scanning the setup code, if the app prompts "Couldn't add Koogeek-XX-XXXXXX", please refer to the first FAQ. Please keep the setup code for future use.

7. You can assign a name to your device and use this name when speaking to Siri. For example, you can name your device "Printer", then launch Siri and speak "Turn on the Printer".

8. Set up customized scenes to control multiple devices with a single command. For example, if you assign the "I'm going to bed" command to the scene of turning off bedroom light and turning on the fan, when you speak "I'm going to bed" to Siri, everything is done.

9. For troubleshooting visit www.koogeek.com

Note:

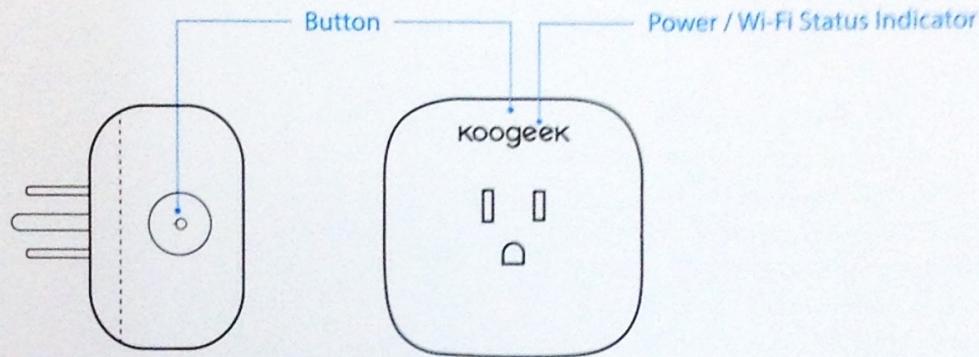

The use of a HomeKit-enabled accessory need the follow permissions:

Settings > iCloud > iCloud Drive > Turn On

Settings > iCloud > Keychain > Turn On

Settings > Privacy > HomeKit > Koogeek Home > Turn On

PLUG OVERVIEW

Button

Press once to manually control the switch (Turning plug "On" or "Off")

Restore factory setting: Press and hold the button for about 10 seconds until the LED turns red. When the LED blinks green, it indicates you have restored the device to factory settings.

Power / Wi-Fi Status Indicator (after setting up)

- Flashing green: Smart Plug is waiting for a Wi-Fi network configuration
- Flashing red: Smart Plug is disconnected from a Wi-Fi network
- Solid green: Smart Plug is "On"
- Light off: Smart Plug is "Off"

Electrical Ratings

120V AC, 60Hz

1800W

General use

Safety Warnings

Plug directly into electric outlet (not into extension cord)

For indoor use only

Remove Smart Plug from outlet before cleaning

DO NOT clean with liquid

DO NOT remove ground pin (middle pin)

DO NOT use in wet or damp areas

Keep children away from Smart Plug and outlet

DO NOT exceed the recommended electrical ratings

DO NOT use in precision timing applications where inaccurate timing could be dangerous (sunlamps, saunas, etc.)

DO NOT use with devices that should not be operated unattended

Legal

Use of the Works with Apple HomeKit logo means that an electronic accessory has been designed to connect specifically to iPod touch, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.

Controlling this HomeKit-enabled accessory automatically and away from home requires an Apple TV with tvOS 10.1 or later or an iPad with iOS 10.1 or later set up as a home hub.

Operation is Subject to the Following Two Conditions:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme avec Industrie Canada exempts de licence standard RSS(s). Son fonctionnement est soumis aux deux conditions suivantes: (1) Cet appareil ne doit pas provoquer d'interférences et (2) cet appareil doit accepter toute interférence, y compris celles pouvant causer un mauvais fonctionnement de l'appareil.

FAQ

Why did I fail to add my Smart Plug to the Koogeek Home app?

1. Make sure your accessory is powered on and nearby.
2. If you have a dual band router, please shutdown 5GHz Wi-Fi networks and connect your phone to the 2.4GHz Wi-Fi network.
3. Make sure your accessory's green LED flashes slowly, if not, please press and hold the reset button for 10 seconds to restore factory settings.
4. Select the accessory shown on screen, then scan the setup code which can be found on the device, instruction manual or inner packaging.
5. If the app prompts "Couldn't add Koogeek -XX-XXXXXX" after you scanning the setup code:
 - (1) delete the current "Home" in Home Settings and close the app;
 - (2) restore the accessory to factory settings;
 - (3) add the accessory again.

Smart Plug works normally after restoring factory settings or unplugging/plugging, but it occasionally gets disconnected from networks and can not be recognized

1. Make sure the number of Wi-Fi connected devices is within the wireless network capacity of your router. Otherwise, please replace with another router.
2. Reconnect your iOS devices to Wi-Fi and make sure your Wi-Fi signal is strong enough.
3. Wait until the network is fixed if your router performs poorly in wireless networks that might result from network congestion.
4. Check the router setting and see if there is any limit to the number of simultaneous client connections.
5. Restart your HomeKit accessory or restore your HomeKit accessory to factory settings, and add your HomeKit accessory to the Koogeek Home app.
6. Update the firmware to the latest version.

How to automate and remotely access my HomeKit accessories?

1. Please visit www.koogeek.com/support/homekit.html
